

Hypnos' proven firm ReActive[™] pocket spring system is expertly engineered to follow the contours of the body and alleviate pressure points. The more active turns in a spring, the greater its ability to respond to your unique shape, height and weight. Orthos Support mattresses contain pure British wool, fairly bought and traceable through The Woolkeepers® initiative to assured farms.

The recycled eOlus™ fibres, alongside the pocket springs, allow air to flow around the mattress and moisture to dissipate.
